# Try These Practical DWARF FRUIT TREES

## North Star Cherry

A new dwarf cherry. Extremely hardy, and bears very young. Wonderful for pies. 1 to 2 ft. \$1.80; 2 to 3 ft. \$2.40.

- Hardy
- Beautiful
- Convenient
- Economical
- Easy Picking

Dwarf fruit trees are enabling millions of people with only small areas for fruit trees, and city families to have a variety of fruit never before possible. Even in small yards there is room for a dozen or more dwarf trees, providing fruit from early summer to late fall. The fruit from dwarf trees is just as large as that grown on standard size trees, and just as delicious. The only difference is that you pick the fruit without a ladder and caring for the trees is a much more simple job. Plant a variety of dwarf trees this year and have a real home fruit garden.

Your garden is not complete until you have this beautiful flower growing in your perennial collection. Now you can grow your own Orchids by planting Iris Kaempferi, which is entirely different from all other Iris and comes into bloom as the early summer fades, continuing to bloom until mid-July. The huge blooms of velvety texture measure 6 to 8 inches across. The leaves are long, narrow and gracefully formed, and the plants remain decorative even after the blooming period is over. It is no wonder that the Kaempferi is called the "Orchid of the Garden." Excellent for cutting it will grow 3 to 4 feet high. Plants thrive in well drained fertile soil (it is to select a location where water stands during winter).

## BENCO'S NEW GOLDEN QUEEN RASPBERRY

A real novelty! A new sensational yellow Raspberry of the black Raspberry type. It is a chance seedling that is a cross between the red Raspberry and the golden Raspberry. It is both a novelty and a real fruit producer—the berry being of a rich golden color of medium size. Its flavor is entirely different from any berry grown—blend between the red and black Raspberry. In many cases it is grown in preference to the red and black Raspberries, because of its sugar-sweet flavor. Just before the berry fully matures it is a rich yellow color and when fully ripe reaches a rich golden yellow. It is truly a novelty shrub for your garden—the most unusual feature of this new variety is that after the berry is picked, the white which is very outstanding during the winter months. The fruit can be eaten fresh or can also be successfully preserved; again they are very outstanding in a glass fruit jar, for the berries retain their rich golden color. ## OZARK RASPBERRY- STRAWBERRY

Be sure and try this new berry. It canes like a raspberry, growing 18 to 24 inches high, and it also caps like a raspberry, but the berries have that good strawberry flavor. Ripens the latter part of July.  
Price: 25c ea.; \$2.50 doz.

## EVERBEARING FIG

Under 1 ft., 83c; 1 to 2 ft., 93c; 2 to 3 ft., \$1.05  
Ripens its fruit from July until frost and each tree will produce fruit first year. Bears on its new growth. Light straw to brown in color, medium size and very sweet. Does not crack easily. Extra good for preserves or eating fresh.  
Figs should be planted more extensively. Do not let the sprouts or suckers grow, but prune the trees so as to have clean bushes at least two feet high. Cut tops back to six or twelve inches above the ground when planting. Such trees will bear fruit and will stand much colder weather than if the sprouts are allowed to grow.

## NEW BLUE BERRIES

GROW YOUR OWN BLUEBERRIES—PICK THEM FRESH OFF THE BUSH  
Cultivated Blueberries are hardy shrubs of rare beauty; they are doubly valuable because they are fast and ornamental all year.  
As a commercial proposition it is one of the most profitable fruits to grow. There is a big market. They make good money in a very short time, for you can begin picking the second or third season after planting.  
Choose piece of ground easily supplied with moisture during dry summer months; it should not, however, at any time, become water-logged. Plant in full sun if possible; they will also do well in partial shade. Be sure the soil is acid. Give only shallow cultivation, no more than 2 to 3 inches deep, so as to leave the roots undisturbed.  
**CONCORD**. Bush of upright habit at maturity exceeding 6 feet in height. The berries are large.  
**JERSEY**. Very large and vigorous in habit. The light blue berries are very large.  
Each 2-Yr., 12 to 18 in. 12

We recommend ordering both varieties so they will cross-pollinate and fruit freely.

All the flowers will mature fruit, and will hold size well until end of season. Ripens 10 days later than Premier. All reports from growers are very enthusiastic. We believe this berry will become a great commercial variety.

That is the record of Boysenberry. The beautiful wine-red fruit combines the delicious flavors of Loganberry, Blackberry and Raspberry, of which it is a cross. No new fruit in many years has caused such a sensation as Boysenberry. In addition to all these remarkable qualities, the plants we offer here have NO THORNS.

## Large, Meaty EVERBEARING BLACKBERRY (TREE FORM)
